EDUCATION

Virginia Commonwealth University Richmond, VA

B.S. Computer Science, Concentration: Data Science, Minor: Artificial Intelligence May 2029

GPA: 3.53 | Dean's List

Relevant Coursework: Data Structures, Linear Algebra, Statistics & Probability, Object-Oriented Programming (Java), Intro to Problem Solving (Python), Essentials of AI, Computing and Data Ethics

SKILLS

Data & AI: Python, SQL, pandas, NumPy, scikit-learn, TensorFlow/Keras, preprocessing, feature engineering, EDA, model evaluation, LangChain, embeddings, RAG

Software & Tools: Java, SQL, REST APIs, Git/GitHub, Jupyter, Linux, CI/CD

PROJECTS

Allstate Predicting Auto Claims Severity ML Project August 2026 – Present

- Analyze 188,318 historical insurance claims to support development of a regression model for predicting claim severity.
- Conduct reproducible data validation and exploratory analysis, checking schema, identifier uniqueness, missing values, duplicates, continuous-variable ranges, and target validity.
- Collaborate with a three-person team using Git/GitHub, documented analysis methods, and independent peer review to maintain reproducible project work.

RELEVANT EXPERIENCE

Break Through Tech AI Program Remote

AI Fellow May 2026 – Present

- Completed nine weeks of hands-on ML coursework, experimenting with Python data libraries and working through data preparation, exploratory analysis, feature engineering, model training, and evaluation.
- Implemented and compared logistic regression, KNN, decision tree, and neural network models; explored LLM/RAG applications using LangChain, embeddings, and vector retrieval.

Hive Systems Richmond, VA

Cybersecurity Consulting Intern May 2026 – August 2026

- Helped establish an internal SOC using Wazuh, validating authentication log ingestion, data quality, and event classification to support downstream analysis and reporting.
- Expanded detection rules from 8 to 34 and developed Wazuh dashboards to visualize event trends, prioritize high-severity alerts, and translate log data into actionable insights.
- Developed individualized QR-code functionality for phishing simulations, enabling recipient-level data collection and engagement tracking across 600+ recipients.

LEADERSHIP

Society of Women Engineers Virginia Commonwealth University

Contact Chair April 2026 – Present

- Communicate key SWE updates to E-Board and chapter members through meetings and weekly newsletters highlighting scholarships, deadlines, conferences, and professional opportunities.

Essentials of AI (CMSC 225) Virginia Commonwealth University

Undergraduate Teaching Assistant August 2026 – Present

- Grade weekly 1,100+ word discussions for 115 students on AI concepts, providing thoughtful, rubric-based feedback.
