SUMMARY

Aspiring cybersecurity professional passionate about building secure, intelligent technology at the intersection of cybersecurity, AI/ML, data, and software engineering. Driven by curiosity and a desire to understand complex systems, solve meaningful problems, and develop technology that creates lasting impact.

EXPERIENCE

Hive Systems | Cyber Consulting Intern | Richmond, VA **May 2026 – August 2026**

- Developed a standardized Wazuh SIEM tagging/labeling framework for multiple log ingestion types, including cloud and endpoint, improving alert prioritization and enabling scalable multi-tenant security monitoring across cloud environments. Also enriched existing Auth0 ruleset from 8 to 34 alert rules
- Designed and built multiple dashboards and investigation queries in Wazuh/OpenSearch, consolidating authentication events, endpoint health, login activity, and security telemetry to streamline daily analyst investigations.
- Integrated Slack notifications for Level 12+ critical security alerts by configuring webhook-based Wazuh alert delivery, reducing manual monitoring and improving visibility into high-priority security events.
- Led the development of a new capability for a customer-facing phishing simulation platform, which included designing and implementing individualized QR code generation and enabling user-level engagement tracking across 600+ recipients

Break Through Tech AI Program | AI Fellow | Cornell Tech **May 2026 – Present**

- Code the full machine learning lifecycle for logistic regression, decision tree, and k-nearest neighbors (KNN) models, from business problem framing through model evaluation.
- Prepare real-world datasets for modeling using train/test splitting, winsorization, and feature engineering; optimize models using loss functions and gradient descent.
- Generate predictions with trained models and assess accuracy to evaluate model performance from a business perspective using pandas, NumPy, scikit-learn, matplotlib, and seaborn in Jupyter Notebook.

Cyleuth Inc. | Cyber Software Engineer Intern | Ashburn, VA **June 2023 – April 2026**

- Build automated pipelines with n8n and OpenAI models that integrate data from multiple sources (NVD, AlienVault, AbuseIPDB, VirusTotal) to collect and summarize vulnerability intelligence.
- Create SIEM detection rules and Kibana dashboards that analyze and visualize security risks in production environments, supporting data-driven operational decisions.
- Configure and maintain remote Linux servers running the ELK Stack (Elasticsearch, Logstash, Kibana) and triage security alerts to identify anomalous patterns in operational data

EDUCATION

Virginia Commonwealth University | Dean's List | GPA: 3.53 **Expected Graduation: May 2029**

Bachelor of Science in Computer Science (Cybersecurity) | *Minor in Artificial Intelligence* **Richmond, VA**

Relevant Coursework: Essentials of AI | Intro to Object-Oriented Programming (Java) | Engineering Professional Development | Intro to Problem Solving (Python) | Computing and Data Ethics | Udemy 100 Days of Code (Python)

SKILLS

Python | pandas | NumPy | scikit-learn | Matplotlib | SQLite | Elasticsearch | Kibana | Wazuh | Auth0 | Linux | AWS (EC2, Lambda) | Azure | Terraform | GitHub | Jira | Slack | Microsoft 365 | Project Management | Data Preparation | Feature Engineering | Model Evaluation | Supervised & Unsupervised Learning

LEADERSHIP AND STUDENT ORGANIZATIONS

Society of Women Engineers | Contact Chair | VCU **April 2026 – Present**

- Stay updated on national SWE organization news, such as scholarships, conferences, webinars, etc., and maintain frequent communication with other EBoard members and our general body members

Application and interview process

Explore Opportunities

Scan the QR code below and click **Explore Opportunities**

Search and apply for Summer Analyst roles that align with your career goals and location preferences.

Assess and Screen

Recruiting will review your background and qualifications against the role requirements.

Selected Technology Development candidates will complete a programming and agent build **assessment**.

Candidates who successfully advance will connect with a recruiter for a **Screen Interview**.

Final Round Interviews

Selected candidates will move forward to the **Final Round Interviews**. This typically consists of several one-on-one interviews with Accenture business executives to assess your skillset and strengths.

Offer

An **Offer** will be extended to successful candidates.
